MackinVision™ - Mackin Library Management System (LMS)

Invest in your student's education with MackinVision™, the innovative library management system solution that grows with your students. Your library software should reflect your needs, and the needs of your students. MackinVision™ is user-driven and will interact with students and library staff at every step to satisfy every need. Ongoing and ever-increasing development ensures that MackinVision™ will always address the ever-changing demands of technological advances while supporting the educational outcomes of students.

Engage
Give your students the ultimate library experience with an easy-to-use, modern interface that reflects popular online streaming sites.

Inspire
Start the reading for pleasure journey.
With inbuilt features specifically designed to connect students with books they will love.

Grow
Introduce developing readers (of all ages) to the library with a simplified visual search interface.

Promote
Create a personalized system to promote your library and resources with a customizable OPAC that reflects your library and school.

Connect
Spend more time on the important things (connecting with students!) with functionality designed to automate administration tasks and save you valuable time.

Demonstrate
Prove return on investment with easy-to-use reporting and live analytics available in a range of formats, to present to stakeholders and decision makers.

Collaborate
Join the community of MackinVision™ library professionals via the community portal to discuss all things library (not to mention access videos, training docs, and connect directly with our support team).

Secure
Prepare for the future (even if you don't know what that looks like yet) with a cloud-based solution that is constantly responding to changing environments and continuing to meet best practice standards to keep your library running, anywhere, anytime.

Encompass
Seamlessly interweave library, classroom, and extracurricular content, with multimedia searching across print, digital and database resources.
